# ABOUT

## The PR-LIVING Group

PR-LIVING is an international group with head office in Belgium.

As a global player, PR is proud to be the supplier of many renowned architects, wholesalers and retailers worldwide and already present in more than 80 different countries.

PR has always been able to provide top notch quality and service due to their own factory representing best of Belgian design.

The PR-LIVING story starts in 1960 with Paul and Paula Rogiers. Wholesale was the first step in this family business that has its roots in Waregem. Already in these days, the family was clearly a trendsetter and a pioneering force in the Benelux furniture branch, this both for importing furniture as well as on the design level. The absolute showpiece of it all is the promotion of the Belgian furniture DNA all over the world.

In 1980 the first steps were taken towards Europe and furniture was also imported from various parts of the world: China, India, Italy and Portugal. At the 2000 millennium, sons Jean-Paul and Pierre Rogiers became co-owners.

*“Waregem remains the epicentre of this company that remains faithful to its Belgian roots.”*

Over the coming years, much more is on the agenda. Permanent innovation and (Belgian) design are the keywords. That is what they call starting the year with a bang! Over the coming five years, PR-LIVING intends to expand into (South-) America. The European headquarters and the showroom in Waregem —city of horses— remains the epicentre of this company that remains faithful to its Belgian roots.

Thanks to participating in the highest renowned international professional trade fairs in Brussels, Paris, Singapore, Cologne and Shanghai, the products designed by the Rogiers family are sold worldwide via the most prestigious decoration and furniture outlets. Meanwhile the company is already a global player with over 500 employees in more than 50 countries.

“Belgium,  
the throbbing  
heart of  
PR-LIVING  
ever since  
1960”

# BELGIUM

address Vijfseweg 84, Waregem  
since 1960

The throbbing heart of PR-LIVING ever since 1960 to be found in Waregem, Flemish city of horses and still the basis of its Belgian roots. It is here that the European headquarters and the accompanying 1500 square metres showroom links EAST to WEST. Over the coming years, the knowhow will be transferred even more to the two factories in China and Romania where the design-unit is situated as well. Here, the daily management is ensured by brothers Jean-Paul and Pierre Rogiers and in this way, they continue the lifelong achievements of Paul and Paula Rogiers.

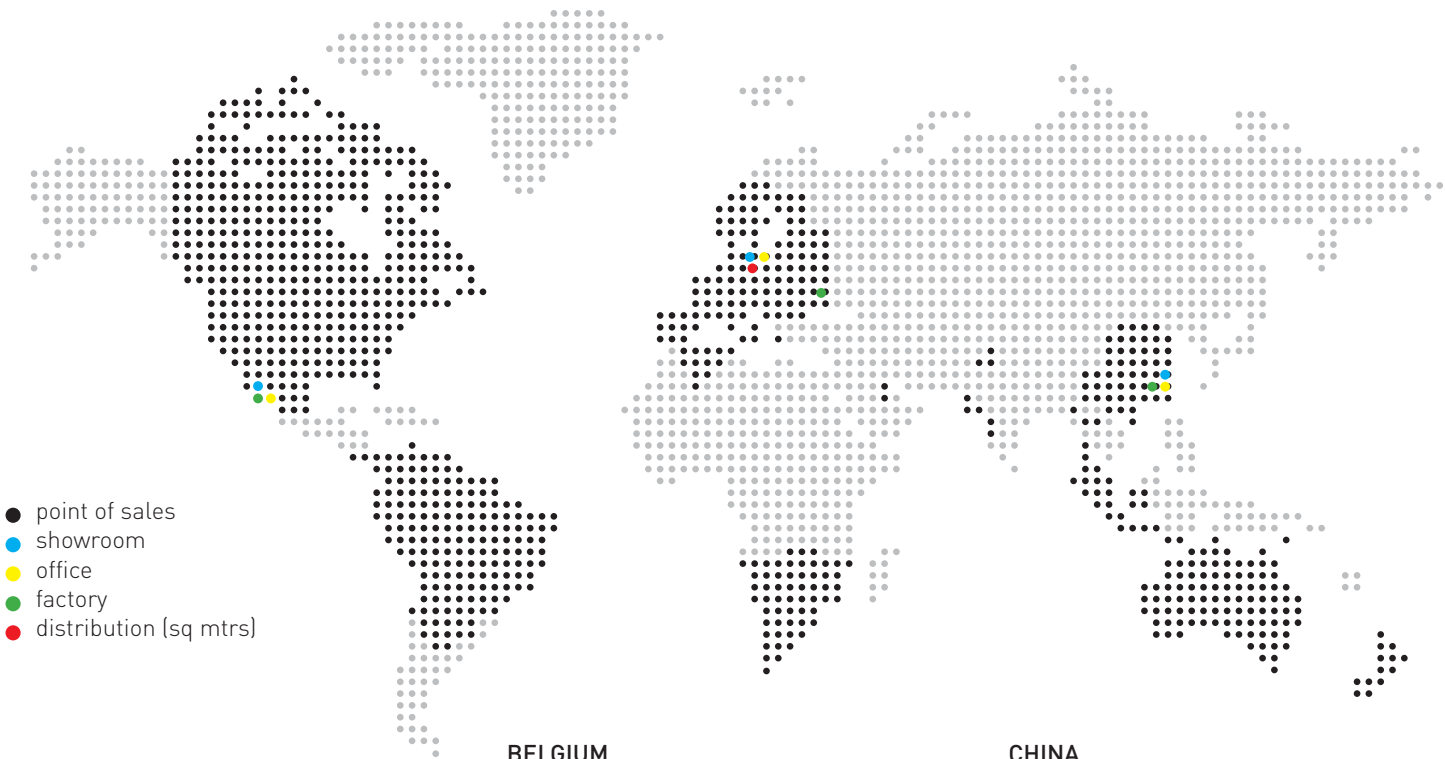

**PR-LIVING**  
today we are located in Europe,  
Asia and North America"

# PR-LIVING DESIGN STUDIO

PR-Living's design studio takes inspiration from worldwide inspirations & trends. The leading force behind a lot of our new developments is our CEO, JP Rogiers. Together with his son Thibault he sets the direction PR Living wants to go.

The continuous flow of new developments wouldn't be possible without the support of our two motivated & very talented designers Stefano and Andy.

**Jean-Paul Rogiers**  
CEO

JP has been fascinated by interior design all his life. He started working in this business when he was 18 years old and has been in the furniture industry since. JP draws his inspiration from his many travels throughout Europe and Asia.

**Thibault Rogiers**  
DESIGN & PRODUCT DEVELOPMENT

Thibault joined PR-Living in 2012, with little experience in furniture or manufacturing he moved to China to support the team in Shanghai. His knowledge was earned during the many days, weeks, years he spent in the factories in China and Romania. Today this is still the part of the job he loves most. To see an idea become reality to the reactions of the first customers.

**Stefano Prevosti**  
DESIGNER

Stefano is from Italy and he graduated in Industrial Design at the Design School in Denmark. In 2017 Stefano exhibited at Milan Design Week and he has been selected by the FSC Design Award in Copenhagen. Stefano has extensive experience and was working for danish and italian design brands prior to joining the PR-Living team.

**Andy Zuo**  
DESIGNER

Andy is from China. He has been in the furniture industry for over 10 years and has extensive experience in product development. Andy makes sure that ideas are executed perfectly and is the link between the drawing board and the factories.

**Jochem Wijnbergen**  
DESIGN & PRODUCT DEVELOPMENT

Jochem is a third-generation cabinet maker. The love for creating top-notch furniture pieces was picked up by him and remained within the family. His sense of craftsmanship started when he followed his father in the workshop, which moved on to graduation in Carpentry and Production Engineering in the Netherlands. After several R&D Management roles globally at well-known furniture companies, he started his own studio in 2016.

# COLLECTION

All over the world we are familiar with this ritual. Simply being able to be oneself after a long working day. Kick of your shoes and just enjoying an evening of television, cosy boding with friends or family or merely enjoying at one's own pace doing just by doing nothing at all. The Chinese have a nice saying for this. Wu Wei: acting by not acting.

If furniture could talk, you would often hear a laugh, sometimes a tear, beautiful stories and experiences. Furniture influences our life on a daily basis. It ensures that extra touch in your home, accordingly to your wishes and needs. Especially this is the plus factor of our furniture. Some see it as a means to make a statement; others consider it a mere object. There are no limits set to what you wish and this is what really makes your house a home. PR Living hopes to make over the years even more customers happy with giving this 'coming home' an extra special touch. Relying on five specific styles, everybody can find what they are looking and longing for, and that is the reason why we can boast customers of all ages all over the world.

CONTEMPORARY COLLECTION

# CONTEMPORARY

Italy: the country of dolce far niente. After a hard day of labour, you can unwind carefree in our Italian collection. Reading a book on your own, socialising with friends or family. Everything is possible and nothing is forced. Enjoy our contemporary and stringent Italian design and discover how to make your house a home.

Our collections are manufactured using the best materials. We only use natural raw materials: linen & cotton. FSC-wood or solid wood recuperative wood such as old oak are our favourite materials.

# SOFAS TECHNICAL INFORMATION

At PR-Living we build all our custom pieces by hand using the best possible materials and to heighest standards.

SOFA CONSTRUCTION

FRAME

We make our frames with solid wood that provides for exceptionally sturdy, long-lasting furniture pieces. We use engineered timber to further reinforce the hardwood frame on the sides and back. We join our frames with corner blocks, heavy-duty staples, and industrial-strength glue. All frames have a 5 year limited frame warranty.

SUSPENSION

The seating of the frame is constructed with sinuous steel springs that are securely fastened and provide long-lasting support and comfort. The back of the frame is constructed with synthetic webbing that offers soft and supportive comfort.

CUSHIONS

We produce all of our seat cushions with a high-quality, high-resilience foam core. On some of our designs, the high-resiliency foam is wrapped in fiber and placed in a channeled cotton casing with a blend of feathers, down and fibers. Over time, all foam and filling will soften depending on the usage. Down blend cushions will become softer and will puddle. This is normal and not considered a defect in construction. Since we wrap the sofa in plastic during transportation, you might experience a slight smell. Once the sofa is unwrapped and allowed to “air-out,” the smell will go away after a few days.

CENTER LEG SUPPORT

Don’t be alarmed when you inspect your sofa and notice the center leg support does not touch the ground. As a rule of thumb, the center leg support, located in the middle of the sofa, typically does not touch the ground when no one is on the sofa. It is there for additional support to help even out the weight.

SEATING COMFORT

Our medium-depth sofas keep you vertical, yet relaxed. The dimensions are our most universal, suiting a range of heights and body types.

CARE INSTRUCTIONS

CUSHION CARE

When you receive your new sofa, please be aware that the cushions will need some time to adjust. Cushions are made to fit your sofa, and are packed, shipped, and delivered to you before being sat on. Depending on how often you use your new sofa, it could take a couple of weeks to allow the cushions to break in and soften up fully. We recommend rotating cushions regularly to ensure even wear and thus prolong the life of your sofa. If the cushions are reversible, you should also flip the cushions along with changing their location. Rotation keeps the cover positioned properly on the cushion core. It also evens out the impact of frictional wear and sun exposure on the fabric. Fluffing cushions regularly will help to restore their loft. We recommend to rotate, flip, and fluff loose pillows weekly or biweekly, depending on the amount of use the piece receives.

FABRICS

**FABRIC CHARACTERISTICS**  
Our fabric selection includes a variety of natural and synthetic materials. While we select durable and high-quality materials, slight differences in texture, color, or appearance among fabrics (and leathers) may occur between production runs. This is normal and not considered a defect. We work closely with our supply chain partners to ensure each production run falls within our approved variance range. Over time exposure to extreme temperature changes and direct sunlight may cause color changes. Fabrics are not guaranteed against wear, fading, or shrinking.

**GENERAL FABRIC CARE**  
We recommend routine vacuuming or light brushing. Use the upholstery attachment tool of your vacuum cleaner to remove loose particles. We recommend to vacuum the sofa at least once or twice a month. This will prevent the build-up of dust , which can damage the fabric over time. Avoid prolonged exposure to direct sunlight, since this can cause fading.

**HOW TO SPOT-CLEAN STAINS**  
Blot spills immediately with a clean, absorbent white cloth. Blot from the outside to the middle of the affected area to prevent rings. Spot cleaning can cause a ring or fading. It is best to have the entire piece or cushion casing cleaned by a professional cleaning service to ensure consistent results.

**OVERALL FABRIC AND SLIPCOVERS CLEANING**  
For thorough cleaning, we recommend using a professional in-home upholstery cleaning service. We suggest annual cleaning, but this can vary depending on usage.

PILLING

Pilling is an inherent characteristic of many high-quality upholstered fabrics and is not a fabric fault or defect. The small pilling pieces must first be allowed to form before they can be removed, so it is a characteristic that cannot be pro-actively resolved. Pilling is caused by natural fiber migration from the yarns to the fabric surface as the fabric is rubbed. When pilling occurs, there is often a concern that the fabric is disintegrating and will leave a worn-out area or not retain the proper structure in the fabric. This is not the case. Pilling will stop once the excess fiber is gone. It is recommended to use a fabric pilling comb to shave off the pills. Rarely does pilling re-occur after utilizing this method.

LEATHERS

Leather is a natural material. Slight differences in texture, color, or appearance from hide to hide may occur. Leather is particularly subject to variations in color and markings, such as wrinkles, stretch marks, and healed scars may show. Also, no piece of furniture can be produced from a single hide. These characteristics make leather unique and are not considered defective. Natural color changes, exposure to extreme temperature changes, and direct sunlight may cause color changes and/or surface damage. Over time, leather will naturally develop a patina and a softer, more supple feel, adding comfort and character.

**GENERAL LEATHER CARE**  
Minor scratches such as fingernail scratches or light scuffs may cause a slight mark without truly damaging the leather. Start by using your fingers to gently buff minor scratches or scuffs on the surface.

FURNITURE

**WOOD CARE**  
Dust your tabletop regularly with a soft dry cloth. To remove food debris and dirt, wipe with a damp cloth and then dry. Do not use an abrasive cleaner. Protect your tabletop from liquids, heat, direct sunlight, and abrasives. Do not leave spills unattended, and use surface pad beneath heated dishes. Use a cutting board and coasters to minimize scratches on your tabletop. Note that wood finishes may still darken with time and exposure to the elements. Maintain wax as needed, using a natural beeswax or paste wax free of paint thinners. Hardware may loosen with use. Periodically check to make sure all connections are tight.
